

Protect Your Outboard Motor

You've worked hard to be able to buy a new Suzuki (O/B) motor, and now it's yours. You've made a great choice in Suzuki because its quality, performance and durability are second to none. Many owners, just like you, have made the same smart purchase decision: to buy a Suzuki Extended Protection (SEP) plan.

While Suzuki's production techniques and materials, as well as its standard warranty, are the best, today's O/B motors have become increasingly complex. In addition, parts and repair costs have accelerated as fast as motor technology. While mechanical failures are rare in today's Suzuki models, you can protect yourself from potentially high costs by investing in Suzuki Extended Protection.

Now is the time to take advantage of the Suzuki Extended Protection plan. The plan can be purchased when you first buy your new Suzuki motor or from any authorized Suzuki O/B marine dealer anytime during your 60-month standard Suzuki Limited Warranty (SEP adds several benefits that the standard warranty does not provide). Your Suzuki dealer is ready to provide you with this top-quality security for your Suzuki O/B that will give you peace of mind for years to come.

Unbeatable Benefits

Along with providing complete peace of mind, the Suzuki Extended Protection plan is economical, dependable and hassle-free. Should you have a problem while covered by the plan, you can go to any authorized Suzuki O/B Marine dealer across the U.S. and Canada for prompt and professional service. But this is only the beginning of its value.

SUZUKI EXTENDED PROTECTION ALSO PROVIDES:

Low Deductible

A \$25 deductible is all that is needed when you have a covered repair. Suzuki will take care of the entire balance of covered parts and repairs using Genuine Suzuki Parts.

No Hour Usage Limitation

Your Suzuki motor was built to be run, and we encourage you to do just that. Like the Suzuki Limited Warranty, there is no hour usage limitation, so you can use and enjoy your Suzuki O/B motor to its fullest for a long, long time.

Towing Reimbursement

In the event of a covered breakdown, SEP will repay the cost of towing your boat and Suzuki motor to your nearest Suzuki O/B Marine dealer or repair center, up to \$50 per occurrence.

Toll-Free Assistance

Should you need help with a claim or have questions, you can call SEP's toll-free number for assistance:
1-877-473-7669, Weekdays from 8:30 a.m. to 8:00 p.m. EST.

Transferability

Your SEP plan is transferable to the next owner during the life of the plan, increasing your Suzuki's resale value.

SEP Q & A

Q: Does the Suzuki Extended Protection (SEP) contract duplicate my Suzuki's standard limited warranty coverage?

A: SEP runs concurrently with the standard limited warranty, and it also provides the additional benefits presented at the left. It then continues with exceptional coverage long after the standard limited warranty expires.

Q: What is covered and what is not covered?

A: SEP covers all major components, parts and system (including all seals and gaskets) on your new Suzuki O/B motor. Normal wear or maintenance items, such as spark plugs, fuses, brushes and bushings are not covered. For specific details, please refer to the SEP service contract.

Q: Is there anything I need to do to keep my SEP contract in effect?

A: Yes! You must maintain your Suzuki O/B motor according to Suzuki's recommendations. See the maintenance schedule in your Suzuki owner's manual for details.

Q: What should I do if I have a mechanical failure?

A: First, get your Suzuki O/B motor to an authorized Suzuki dealership. Bring your SEP contract and/or number, and your maintenance record logbook. With your authorization, the dealership service manager will determine the cause of the failure, estimate the cost of the repair and then contact SEP for a claim authorization number. With the authorization, they will make the repairs and have you back on the water in no time.

Q: How do I transfer my SEP coverage if I sell my Suzuki O/B motor?

A: Provided you still have some coverage (time) left on your SEP contract, simply send a signed letter requesting transfer, and include your agreement number, the new owner's information, a copy of the bill of sale, a copy of your maintenance log and a small transfer fee. It's easy!
